

# HOW TO MEASURE

The first step in locating cushions that will fit your patio furniture is to take proper measurements. You can measure your existing cushions or the patio furniture itself. Once you have taken the measurements, you should be able to easily find the replacement cushions that you need. Below is a sample cushion that demonstrates the different measurements that you will need to take note of. Measurements presented on our site: Width x Length x Thickness (Back=Seat=Length).

## Measuring Patio Furniture

The following are instructions on how to gather measurements from your patio furniture. A good tip is to try to imagine a new patio cushion sitting on the furniture. This helps to know how high and far you would like the cushions to come to the edges.

### **Back Measurement**

Measure the top edge of the furniture down to the seat.

### **Seat Measurement**

Measure from where the fold of the cushion would be out to the front edge of the furniture.

### **Width Measurement**

Measure the inner edges of the furniture that your new cushion sits between.
